Impero Education Pro v8.4.83

Release Document

Table of Contents

Minimum System Requirements

The specific system requirements for running Impero Education Pro v8.3+ on different operating systems are described below. Please make sure that your system meets these requirements and that your operating system is up to date before downloading the latest version of Education Pro.

Be sure to update to enjoy all the latest features and improvements for Education Pro. If your system does not meet the minimum requirements, the features of Education Pro may not work as described. Actual requirements may also vary based on your system configuration along with the applications and the features you install.

Impero Recommends that end users do not exceed a maximum of 5000 devices per Impero Education Pro Server installation.

Due to the nature of keyword detection configurations the HDD requirements for Impero Education Pro can vary from site to site, customers are advised to contact our support team should you wish to clarify*.

Requirements highlighted in Green represent changes made to the minimum system requirements in this version

Please Note: Actual requirements will vary based on your system configuration, number of clients, and the applications and features you choose to install. If you are running any system not listed in the above document, please contact Impero to discuss your requirements.
